## Functions

Type	Functions
13.01	<p><b>Monostable</b> On closure of a switch between terminals (B2-B3) the output contact will close, and remain so, until the switch opens.</p>
	<p><b>Bistable</b> After every impulse (B1-B2), the output contact changes state - alternately switching from open to closed and vice versa.</p>
13.12	<p><b>Call and Reset relay</b> On momentary closure of the Set switch (S), the output contact closes. Only a momentary closure of the Reset switch (R) will open the output contact.</p>
13.71 13.81	<p><b>(RI) Step relay</b> After every impulse, the output contact changes state - alternately switching from open to closed and vice versa.</p>
13.91	<p><b>(RI) Step relay</b> After every impulse, the output contact changes state - alternately switching from open to closed and vice versa.</p>
	<p><b>(IT) Timing step relay</b> On initial impulse the output contact closes and timing starts for the pre-set duration (fixed 10 min); On expiry of the time delay, the output contact opens. During the timing period it is possible to immediately open the contact with a further impulse.</p>

## Operating mode setup for type 13.91

RI → IT		<p>a) Remove the supply voltage b) Press the control button c) Apply the supply to the relay, keeping the button closed. After 3 second, the light will flash twice to indicate the selection of the "IT" function, or flash once for "RI" function.</p>
