

1A Motor Shield For Arduino

Brand: [DFRobot](#)

Product Code: DRI0001

This Motor shield for Arduino uses L293 chip which allow to drive two 7-12V DC motors with maximum 1A current. This shield can be directly mount onto standard Arduino Duemilanove and Arduino Mega.

Specification

- 2 way 7-12V motor drive
- Up to 1A current each way
- Pin 5,6,7,8 are used to drive two DC motor
- Support PWM speed control
