## IO Expansion Shield For Arduino(V5) (SKU: DFR0088)

### Introduction

Our IO expansion board is evolving, this latest [V5 IO expansion shield](#) is now supporting Xbee. It combines our popular [Xbee shield](#) with [IO expansion shield\(V4\)](#). It even supports [SD card](#) which provides the ultimate functional expansion for Arduino so far. As its predecessor, it supports RS485, [APC220](#), [Bluetooth](#) communication, servo control.

### Specification

- Support RS485
- Support Xbee (Xbee pro)
- Support Bluetooth
- Support APC220
- Support SD card read/write

### Documents

- [Wiki Doc](#)
- [Schematics](#)
- [Review from funnyrobotics](#)
