MELF PIN Diode

Features

- **High Power Handling** •
- Low Loss / Low Distortion
- Low Thermal Resistance •
- Leadless Low Inductance MELF Package
- Available as a Chip •
- Surface Mountable
- **RoHs** Compliant
- MSL 1

Description

M/A-Com's MELF packaged PIN diode line encompasses a comprehensive range of electrical characteristics. The particular die in the MA4P504-1072T utilizes M/A-Com's unique CERMACHIP passivation process which provides for a hard glass encapsulation that hermetically seals the active area of the chip. This packaged CERMACHIP PIN diode is ideally suited for use in high power applications where high RF voltages are present.

The chip is enclosed in a rugged ceramic Metal Electrode Leadless Faced (MELF) surface mount package and is full face bonded to refractory metal pins on both the anode and cathode. The result is a low loss PIN diode with low thermal resistance due to symmetrical thermal paths. This rectangular PIN diode is designed for high volume tape and reel assembly. This user friendly package design provides for extremely easy automatic pick and place, indexing and assembly. All solderable surfaces are tin plated and compatible with industry standard reflow and vapor phase soldering processes.

Applications

The MA4P504-1072T MELF packaged PIN diode is suitable for usage in high incident power series, shunt, or series-shunt switches as well as attenuator applications from HF through UHF frequencies.

ADVANCED: Data Sheets contain information regarding a product M/A-COM is considering for development. Performance is based on target specifications, simulated results, and/or prototype measurements. Commitment to develop is not guaranteed. PRELIMINARY: Data Sheets contain information regarding a product M/A-COM has under develop-

ment. Performance is based on engineering tests. Specifications are typical. Mechanical outline has been fixed. Engineering samples and/or test data may be available. Commitment to produce in volume is not guaranteed

Package Style (ODS 1072) Outline Drawing

Dimensions	Package Style 1072			
	in	mm		
A	0.093	2.36		
В	0.050	1.27		
С	0.060	1.52		

Absolute Maximum Ratings^{1,2} @ 25°C

Parameter	Absolute Maximum		
Forward Voltage	1.0 V		
Reverse Voltage	500V		
Operating Temperature	-65°C to +175°C		
Storage Temperature	-65°C to +200°C		
Mounting Temperature	+260°C for 30 seconds		

1. Exceeding these limits may cause permanent damage to the device

2. Values will derate over temperature.

Assembly Recommendations

- Devices may be soldered using standard 63/37, Sn/Pb or RoHS compliant solders. Leads are tin plated 50µM thick to ensure an optimum connection.
- For recommended Sn/Pb and RoHS soldering profile See Application Note <u>M538</u> on the M/A-COM website.

Handling Procedures

The following precautions should be observed to avoid damaging these devices.

Cleanliness and Storage

These devices should be handled and stored in a clean environment. Ends of the device are tin plated for greater solderability. Continuous exposure to high humidity (>80%) for extended periods may cause the surface to oxidize. Caution should be taken when storing devices for long periods.

ESD

These devices are susceptible to ESD and are rated Class 1C.

General Handling

Device can be handled with tweezers or vacuum pickups and are suitable for use with automatic pick-and-place equipment.

Note: To compare other MELF packaged diodes to the MA4P504-1072, please click on the link to an older version datasheet: PACKAGED PIN DIODES

RoHS

The MA4P504-1072 is fully RoHS compliant meaning it contains less than the maximum allowable concentration of 0.1% by weight in homogenous materials for lead, hex chrome, mercury, PBB, PBDE, and 0.01% for cadmium.

Mounting Techniques

Solder Attach

Typical wave soldering or reflow techniques may be used to mount M/A-COM's SMQ packages to circuit boards using Sn63/Pb37 alloy or RoHS compliant solders. For more information visit the M/A-COM website and read application note M538.
