CMOS IR Camera Module - 500x582

sku: SEN-08773

Description: This is a high-quality black and white CMOS camera module with high-power infrared LEDs to light up the night. Power the CA-84AC module, hook up any display, monitor, or LCD screen with an RCA input and get vivid black and white video at 500x582 resolution even in completely dark environments. Module is easily mountable and should be powered close to the 12V spec. Comes with high quality optics, all the on board circuitry to output RCA signal, and cable harness.

Features:

- 12V@150mA
- 6 IR LEDs for night time illumination
