## Motor controller Board

### TR-3A

This is the **Dagu Mr. Basic Dual 2A Motor Controller Board**. This simple motor controller PCB is designed specifically for Mr. Basic. Capable of working from 3.6V - 6V this PCB provides speed (PWM) and direction control of 2 motors with up to 2A per motor. Over half of the PCB is double sided project board with plate through holes for maximum versatility. This board requires soldering. It is supplied in re-sealable plastic bag with cardboard header.

- Dual 2A motor controller board
- Designed specifically for Mr. Basic
- Capable to work in 3.6V - 6V
- Requires soldering
