

## DEFLECTION PROCESSOR

The KA2138 is a monolithic integrated circuit encapsulate in a 20 dual-in-line package designed for vertical, horizontal deflection signal processing for a CRT display.

This IC can be connected to the KA2131 (for vertical output) to form a deflection processing system for CRT display.

## FUNCTIONS

### (Vertical Block)

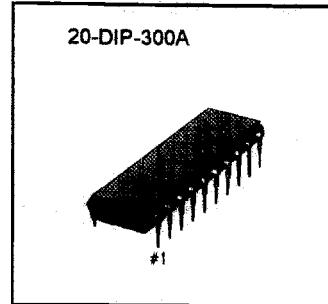

- Vertical oscillator & Ramp generator
- Sampling type DC voltage control within retrace time

### (Horizontal Block)

- Horizontal oscillator & AFC
- X-Ray protector
- AFC sawtooth wave generator
- Horizontal pulse duty setting
- Horizontal phase shifter

## FEATURES

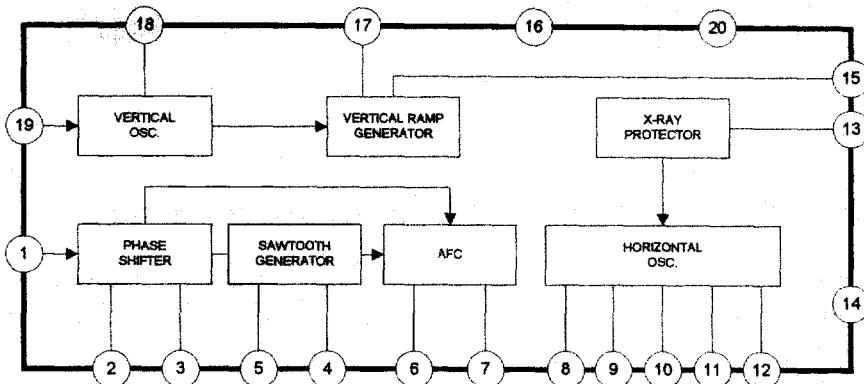

- Vertical pull-in range 20Hz permits non-adjusting at vertical synchronizing 50Hz or 60Hz.
- Good vertical linearity because DC supply at the vertical output stage is subjected to sampling type control during retrace time
- The horizontal oscillation frequency is stable from 15kHz to 100kHz.
- The horizontal display can be shifted right or left
- The horizontal/vertical synchronizing pulse input can be used intact regardless of the difference in pulse polarity and pulse width.
- The AFC feedback sawtooth wave can be obtained by simply applying a flyback pulse to the IC as a trigger pulse
- Any duty of horizontal pulse can be set

## ORDERING INFORMATION

| Device | Package     | Operating Temperature |
|--------|-------------|-----------------------|
| KA2138 | 20-DIP-300A | -20 °C ~ +70 °C       |

## BLOCK DIAGRAM

ABSOLUTE MAXIMUM RATINGS ( $T_A = 25^\circ\text{C}$ )

| Item                  | Symbol                         | Value      | Unit |
|-----------------------|--------------------------------|------------|------|
| Supply Voltage        | $V_{10}$ (max), $V_{20}$ (max) | 14         | V    |
| Power Dissipation     | $P_D$                          | 780        | mW   |
| Operation Temperature | $T_{opr}$                      | -20 ~ +70  | °C   |
| Storage Temperature   | $T_{stg}$                      | -55 ~ +150 | °C   |

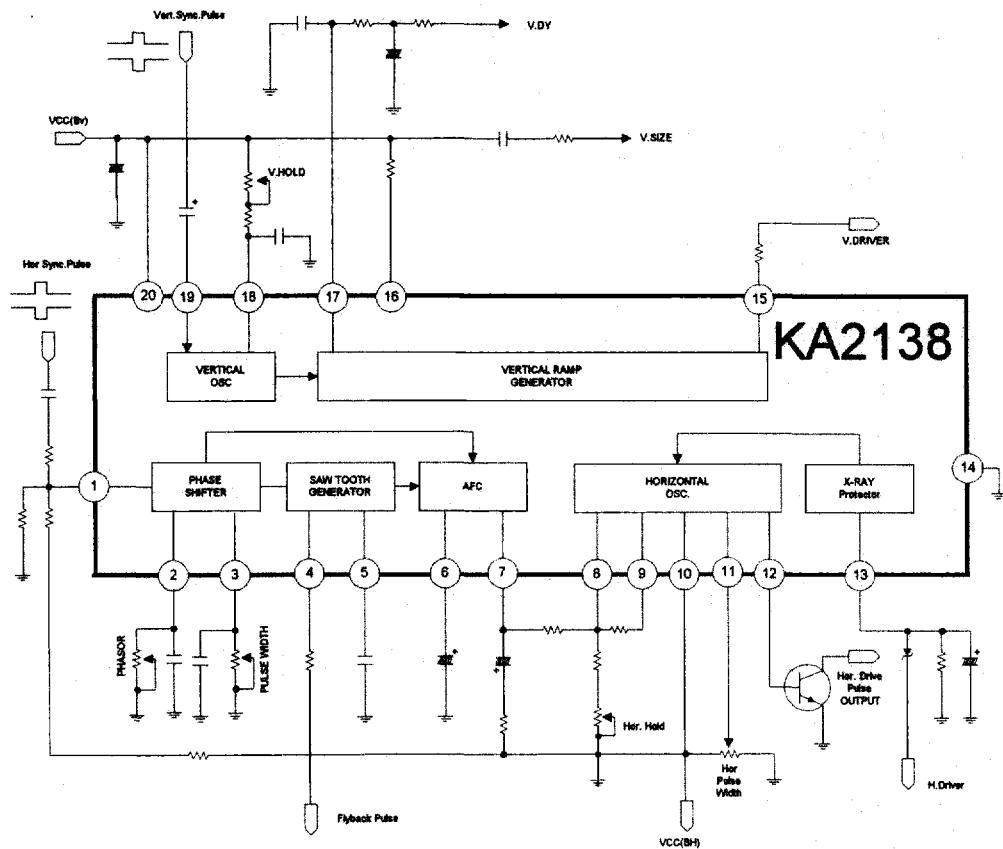

RECOMMENDED OPERATION CONDITIONS ( $T_A = 25^\circ\text{C}$ )

| Item                     | Symbol           | Min | Typ | Max  | Unit      |
|--------------------------|------------------|-----|-----|------|-----------|
| Supply Voltage           | $V_{10}, V_{20}$ | 9   | 12  | 13.5 | V         |
| Vertical Pulse Voltage   | $V_V$            | 2.0 | 5.0 | 6.0  | $V_{P-P}$ |
| Horizontal Pulse Voltage | $V_H$            | 2.0 | 5.0 | 6.0  | $V_{P-P}$ |

**ELECTRICAL CHARACTERISTICS ( $V_{CC10} = V_{CC20} = 12V$ ,  $T_A = 25^\circ C$ )****Table 1. Electrical Characteristics**
