

Lesson 2-Buzzer play music

1.Learning goals:

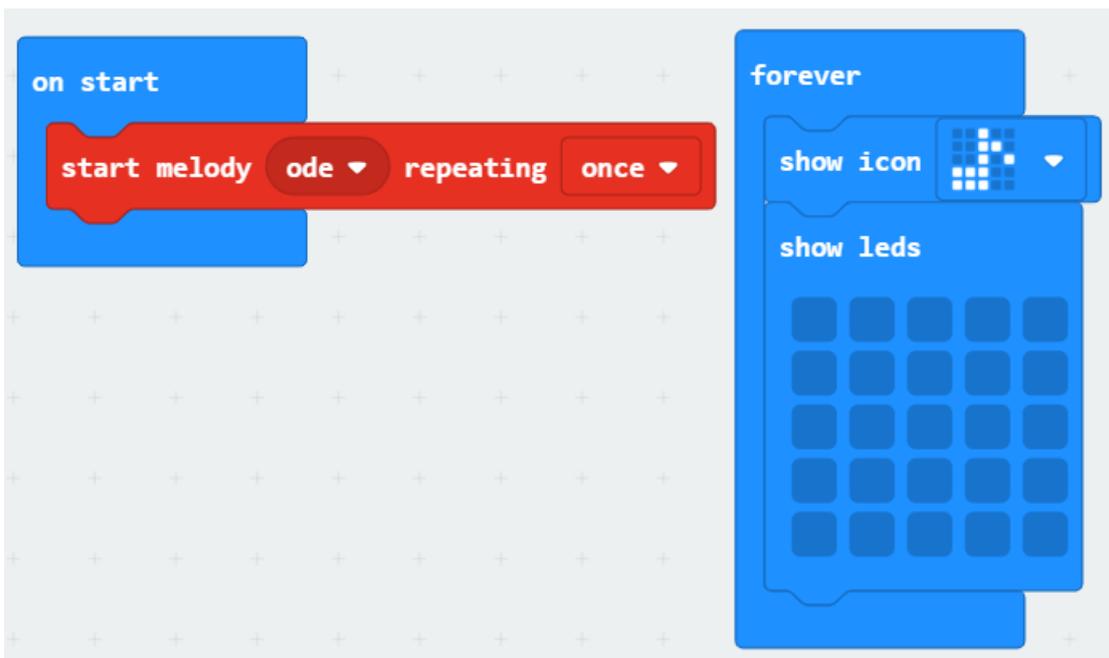

This lesson learns to use graphical programming to let the buzzer of the micro:bit play music.

2.Search for blocks:

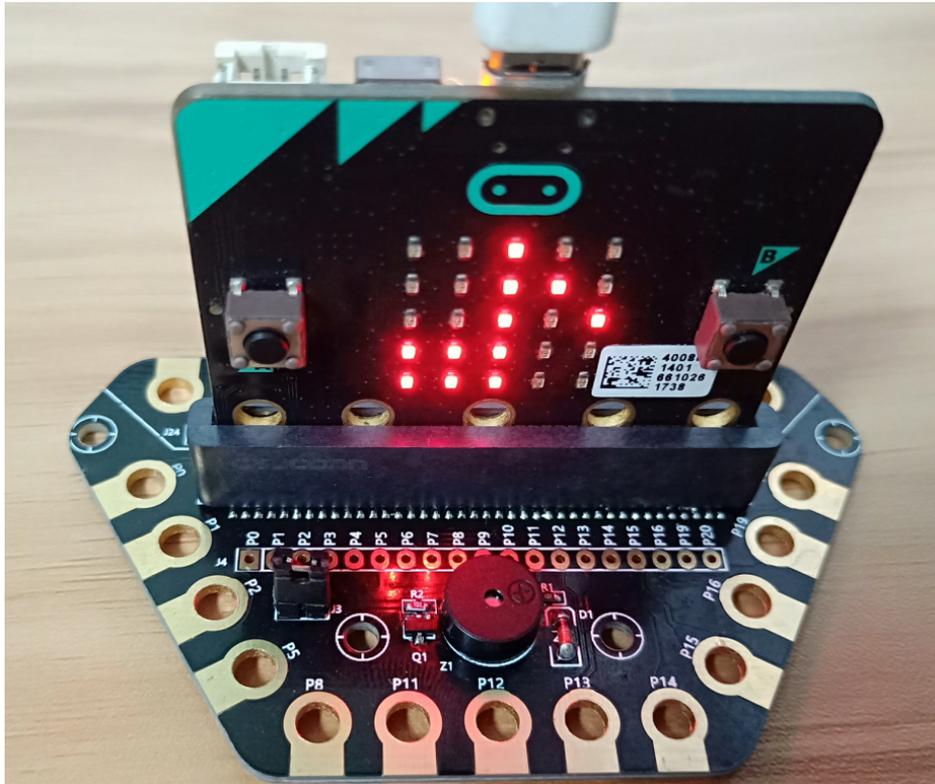

3. Combine blocks:

4.Download programming

After the program is downloaded. We can see that a note will flash on the dot matrix and the buzzer will play the ode once. As shown in figure.

Note: There is a headphone jack on the expansion board that can be used to plug in headphones. The buzzer has no sound when the jumper switch is removed.
