

## (SF-HD850/SF-HD65/SF-HD62) LASER ASSEMBLIES

This document shows the differences in the three laser assemblies that are used in the following units:

GIG-STAR	SF-HD65/SF-HD850
GIG-MASTER	SF-HD65/SF-HD850
DVX-880	SF-HD62/SF-HD65/SF-HD850
DVG-888	SF-HD65/SF-HD850
DVG-777	SF-HD65/SF-HD850

### Laser Assemblies

When somebody wants to order a laser assembly for one of the above units, you must first find out which assembly they need. Below the 3 above-mentioned laser assemblies are pictured.

### Desolder Points

When these laser assemblies are shipped to us, they are shipped with some protective soldering that needs to be desoldered before installing. It is important to let those who are ordering a laser assembly this prior to shipping them out. The desolder points are illustrated below.

\*\*\*\*The SF-HD65 and SF-HD850 laser assemblies can be used interchangeably.

To complete an order:

- 1) Check the above list of units and compatible laser assemblies to determine which assemblies are compatible.
- 2) Have the technician pull out the laser assembly and check which version is required by viewing the pictures below to identify.
- 3) Make sure that the technician is aware of the desolder point. If they have done desoldered a laser assembly before, instruct them to save the old laser assembly for comparison to see what a desoldered laser assembly looks like.

SF-HD62 TOP VIEW

From top view, the SF-HD62 is identified by its BLACK plastic housing.

# SF-HD62 BOTTOM VIEW

From the bottom view, the SF-HD62 is identified by its PART NUMBER (small print.)

## SF-HD62 DESOLDER POINT

This is the DESOLDER  
point for the SF-HD62

SF-HD65 TOP VIEW

From top view, the SF-HD65 is identified by its GRAY plastic housing.

# SF-HD65 BOTTOM VIEW

From the bottom view, the SF-HD65 is identified by its PART NUMBER (small print.)

# SF-HD65 DESOLDER POINT

SF-HD850 TOP VIEW

The SF-HD65 and SF-HD850 are identical from the TOP VIEW.

# SF-HD850 BOTTOM VIEW

From the bottom view, the SF-HD850 is identified by its PART NUMBER (small print.)
