Robot Soccer

The Robot Football is an infrared remote control kit, its microprocessor provides 4 different channels to have 4 robots to play together on the ground. Two separate motors make it moves forward or backward, turns right or left and another motor to kick the ball. Two wheels running to have the robot moves smoothly. Learn how to control the ball, hold it and kick it out. Are you ready to win the championship by your own build Robot? Do it now

Note: Specifications are subject to change. Order Code can be different from Manufacturer's Model No.
