The TEN 5WI series is a family of high performance dc-dc converter modules with 5W output power, featuring ultra wide input voltage ranges of 9-36VDC or 18-75VDC. They come in a shielded DIP-24 metal package with industry-standard footprint.

A high efficiency allows -40°C to +70°C operation ambient temperatures at full load. Standard features include over voltage protection and continuous short circuit protection. Typical applications for these converters are battery operated equipment and distributed power architectures in communication, instrumentation and industrial electronics, everywhere where a wide input voltage range is required.
