

## Rail-to-Rail CMOS Dual Operational Amplifier

- Rail-to-rail input and output voltage ranges
- Single (or dual) supply operation from 2.7V to 16V
- Extremely low input bias current: 1pA typ.
- Low input offset voltage: 2mV max.
- Specified for 600Ω and 100Ω loads
- Low supply current: 200μA/ampli ( $V_{CC} = 3V$ )
- Latch-up immunity
- ESD tolerance: 3kV
- Spice macromodel included in this specification

### Description

The TS912 is a rail-to-rail CMOS dual operational amplifier designed to operate with a single or dual supply voltage.

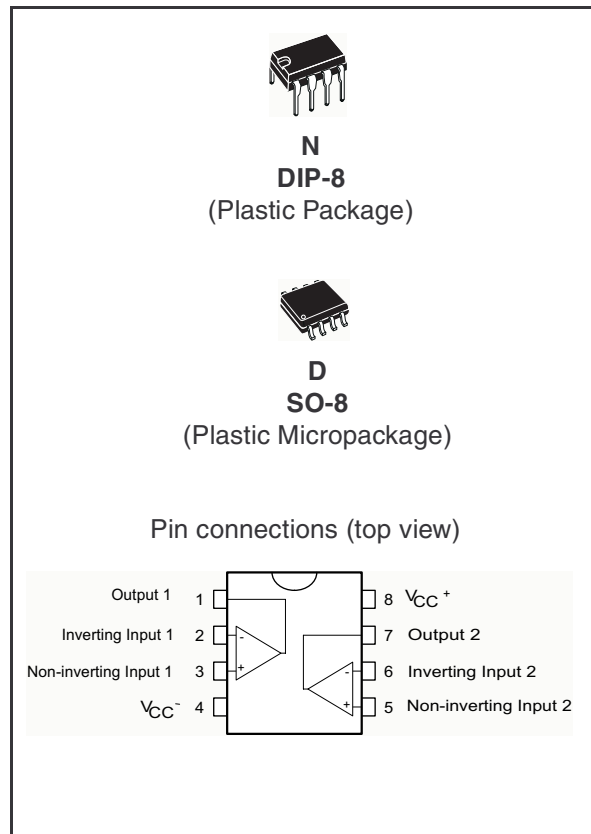

The input voltage range  $V_{icm}$  includes the two supply rails  $V_{CC}^+$  and  $V_{CC}^-$ .

The output reaches:

- $V_{CC}^- + 30mV$ ,  $V_{CC}^+ - 40mV$ , with  $R_L = 10k\Omega$
- $V_{CC}^- + 300mV$ ,  $V_{CC}^+ - 400mV$ , with  $R_L = 600\Omega$

This product offers a broad supply voltage operating range from 2.7V to 16V and a supply current of only 200μA/amp ( $V_{CC} = 3V$ ).

Source and sink output current capability is typically 40mA (at  $V_{CC} = 3V$ ), fixed by an internal limitation circuit.

$R_{thjc}$	Thermal Resistance Junction to Case		$^{\circ}C/W$
	DIP8 SO-8	41 40	
ESD	HBM: Human Body Model <sup>(5)</sup>	3	kV
	MM: Machine Model <sup>(6)</sup>	200	V
	CDM: Charged Device Model	1500	kV

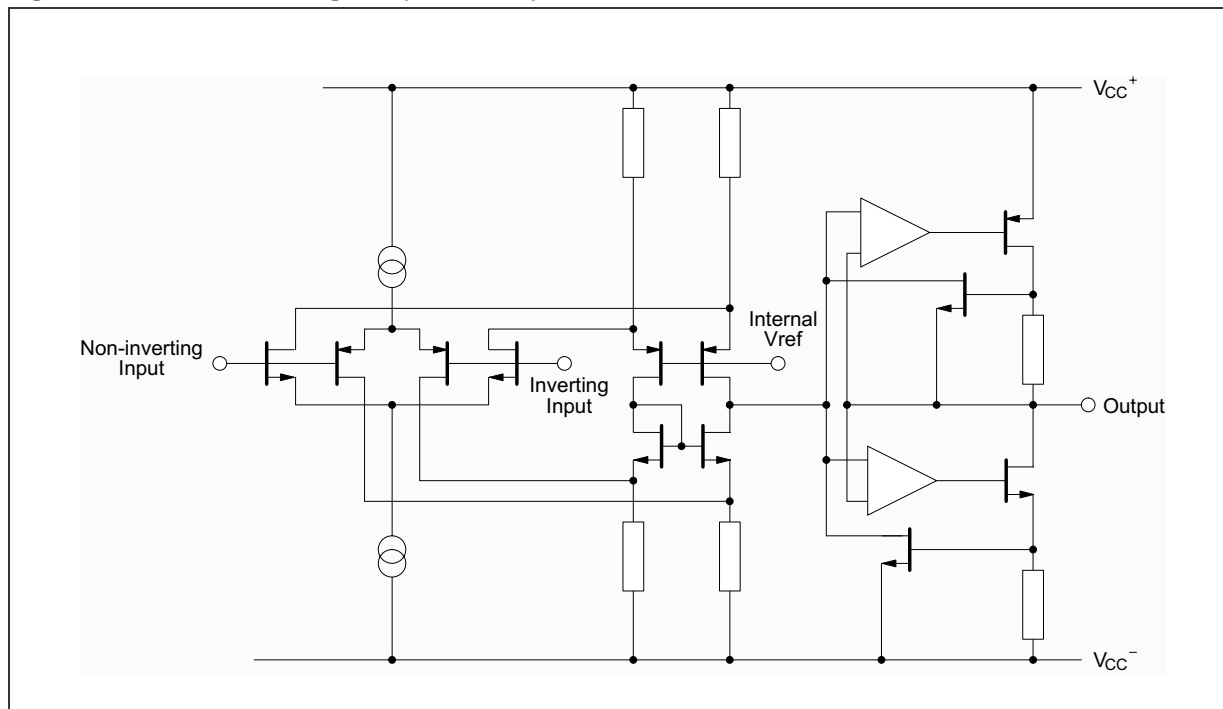

- All voltages values, except differential voltage are with respect to network ground terminal.
- Differential voltages are non-inverting input terminal with respect to the inverting input terminal.
- The magnitude of input and output voltages must never exceed  $V_{CC}^+ + 0.3V$ .
- Short-circuits can cause excessive heating. Destructive dissipation can result from simultaneous short-circuit on all amplifiers. These values are typical.
- Human body model, 100pF discharged through a 1.5k $\Omega$  resistor into pin of device.
- Machine model ESD, a 200pF cap is charged to the specified voltage, then discharged directly into the IC with no external series resistor (internal resistor < 5 $\Omega$ ), into pin to pin of device.

**Table 2. Operating conditions**

Symbol	Parameter	Value	Unit
$V_{CC}$	Supply voltage	2.7 to 16	V
$V_{icm}$	Common Mode Input Voltage Range	$V_{CC}^- - 0.2$ to $V_{CC}^+ + 0.2$	V

### 3 Typical Application Information

## 5 Macromodels

### 5.1 Important note concerning this macromodel

Please consider following remarks before using this macromodel.

- All models are a trade-off between accuracy and complexity (i.e. simulation time).
- Macromodels are not a substitute to breadboarding; rather, they confirm the validity of a design approach and help to select surrounding component values.
- A macromodel emulates the NOMINAL performance of a TYPICAL device within SPECIFIED OPERATING CONDITIONS (i.e. temperature, supply voltage, etc.). Thus the macromodel is often not as exhaustive as the datasheet, its goal is to illustrate the main parameters of the product.
- Data issued from macromodels used outside of its specified conditions ( $V_{CC}$ , Temperature, etc.) or even worse: outside of the device operating conditions ( $V_{CC}$ ,  $V_{icm}$ , etc.) are not reliable in any way.

In *Section 5.2* and *Section 5.4*, the electrical characteristics resulting from the use of these macromodels are presented.

### 5.2 Electrical characteristics from macromodelization

Table 6. Electrical characteristics resulting from macromodel simulation at  $V_{CC}^+ = 3V$ ,  $V_{CC}^- = 0V$ ,  $R_L$ ,  $C_L$  connected to  $V_{CC}/2$ ,  $T_{amb} = 25^\circ C$  (unless otherwise specified)

Symbol	Conditions	Value	Unit
$V_{io}$		0	mV
$A_{vd}$	$R_L = 10k\Omega$	10	V/mV
$I_{CC}$	No load, per operator	200	$\mu A$
$V_{icm}$		-0.2 to 3.2	V
$V_{OH}$	$R_L = 10k\Omega$	2.96	V
$V_{OL}$	$R_L = 10k\Omega$	30	mV
$I_{sink}$	$V_O = 3V$	40	mA
$I_{source}$	$V_O = 0V$	40	mA
GBP	$R_L = 10k\Omega$ , $C_L = 100pF$	0.8	MHz
SR	$R_L = 10k\Omega$ , $C_L = 100pF$	0.3	V/ $\mu s$

## 6 Package Mechanical Data

In order to meet environmental requirements, ST offers these devices in ECOPACK® packages. These packages have a Lead-free second level interconnect. The category of second level interconnect is marked on the package and on the inner box label, in compliance with JEDEC Standard JESD97. The maximum ratings related to soldering conditions are also marked on the inner box label. ECOPACK is an ST trademark. ECOPACK specifications are available at: [www.st.com](http://www.st.com).

### 6.1 DIP-8 Package

## 6.2 SO-8 Package

## 7 Revision History

**Table 8. Document revision history**

Date	Revision	Changes
Dec. 2001	1	First Release
July 2005	2	1 - PPAP references inserted in the datasheet see <i>Table : on page 1</i> 2 - ESD protection inserted in <i>Table I: Key parameters and their absolute maximum ratings on page 2</i>
Oct. 2005	3	The following changes were made in this revision: – Some errors in the Order Codes table was corrected <i>on page 1</i> . – Reorganization of <i>Chapter 5: Macromodels on page 12</i> .
Feb. 2006	4	– Parameters added in <i>Table 1. on page 3</i> ( $T_j$ , ESD, $R_{thja}$ , $R_{thjc}$ ).

**Please Read Carefully:**

Information in this document is provided solely in connection with ST products. STMicroelectronics NV and its subsidiaries ("ST") reserve the right to make changes, corrections, modifications or improvements, to this document, and the products and services described herein at any time, without notice.

All ST products are sold pursuant to ST's terms and conditions of sale.

Purchasers are solely responsible for the choice, selection and use of the ST products and services described herein, and ST assumes no liability whatsoever relating to the choice, selection or use of the ST products and services described herein.

No license, express or implied, by estoppel or otherwise, to any intellectual property rights is granted under this document. If any part of this document refers to any third party products or services it shall not be deemed a license grant by ST for the use of such third party products or services, or any intellectual property contained therein or considered as a warranty covering the use in any manner whatsoever of such third party products or services or any intellectual property contained therein.

**UNLESS OTHERWISE SET FORTH IN ST'S TERMS AND CONDITIONS OF SALE ST DISCLAIMS ANY EXPRESS OR IMPLIED WARRANTY WITH RESPECT TO THE USE AND/OR SALE OF ST PRODUCTS INCLUDING WITHOUT LIMITATION IMPLIED WARRANTIES OF MERCHANTABILITY, FITNESS FOR A PARTICULAR PURPOSE (AND THEIR EQUIVALENTS UNDER THE LAWS OF ANY JURISDICTION), OR INFRINGEMENT OF ANY PATENT, COPYRIGHT OR OTHER INTELLECTUAL PROPERTY RIGHT.**

**UNLESS EXPRESSLY APPROVED IN WRITING BY AN AUTHORIZE REPRESENTATIVE OF ST, ST PRODUCTS ARE NOT DESIGNED, AUTHORIZED OR WARRANTED FOR USE IN MILITARY, AIR CRAFT, SPACE, LIFE SAVING, OR LIFE SUSTAINING APPLICATIONS, NOR IN PRODUCTS OR SYSTEMS, WHERE FAILURE OR MALFUNCTION MAY RESULT IN PERSONAL INJURY, DEATH, OR SEVERE PROPERTY OR ENVIRONMENTAL DAMAGE.**

Resale of ST products with provisions different from the statements and/or technical features set forth in this document shall immediately void any warranty granted by ST for the ST product or service described herein and shall not create or extend in any manner whatsoever, any liability of ST.

ST and the ST logo are trademarks or registered trademarks of ST in various countries.

Information in this document supersedes and replaces all information previously supplied.
